

Soil Profile Pit Specifications, if county staff are performing the soil profile.

Quantity	Often only one pit is needed. If your site has highly variable soils multiple pits may be excavated.
Location	Pit location shall be within 50ft of the wastewater system installation.
Prepare	Contact Kansas One Call At least 48 hours prior to excavationat: 1-800-344-7233 or dial "811"
Construction	<ul style="list-style-type: none"> -Slope one end of the pit to provide safe access. -For public safety and for most accurate results, please coordinate excavation time to match the site evaluation time. -Pits may be requested to be dug deeper if a lagoon is preferred, to validate adequate clay, no water found within 4ft of lagoon bottom, or presence of shale.
Results	Profile results will be shared with owner & contractor on site
